

today's wood frame, hardboard surface

# FLUSH GARAGE DOORS

are growing in popularity all over America . . .

and for 4 very good reasons . . . ✓ CHECK THEM!

SMOOTH FLUSH

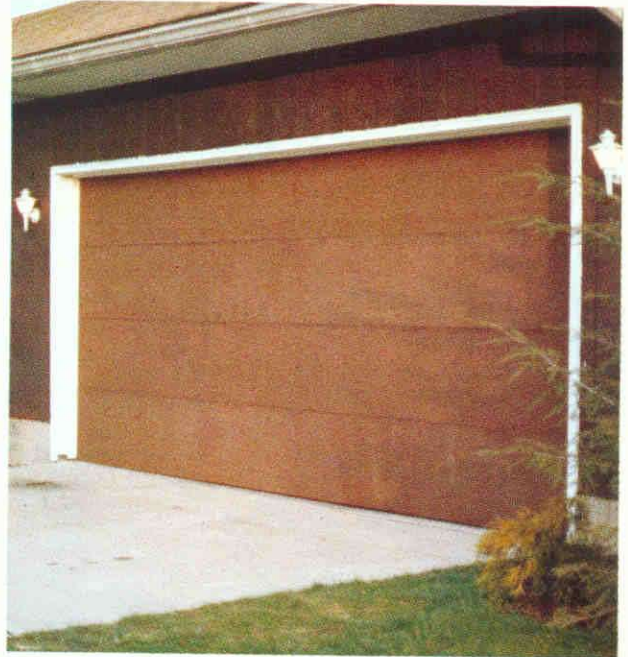

## ✓ 1. APPEARANCE

The flush garage door look is "in". Clean lines and flat surfaces complement today's homes. They are easily painted and decorated to match or highlight any decor. Choose from smooth, regular hardboard finish or deep-textured simulated woodgrain finish. (See detail photo below.)

## ✓ 2. PRICE

Flush garage doors are priced competitively with any other type of garage door. They are built to last, to resist damage from the elements, adding beauty to your home for years. They provide extra value for your money.

RUFF-SAWN FLUSH

## ✓ 3. ENERGY SAVING

Don't let "R" values and "U" values, confuse you or convince you to buy higher priced doors. Flush garage doors are available with expanded polystyrene insulation throughout. One of the most effective insulating materials in use today. And for maximum heat loss protection, ask your dealer to install wood with vinyl door stop, an all around garage door seal.

## ✓ 4. LOW MAINTENANCE

Because flush garage doors are finished in hardboard, there is no solid wood face to swell, split or rot. Maintenance work and costs are minimal with periodic painting.

RUFF-SAWN HARDBOARD (DETAIL)

GIVE YOUR HOME THAT DISTINCTIVE, FINAL TOUCH . . .
