

WOOD PANEL DOORS

"The Traditional Look in Garage Doors"

RAISED REDWOOD PANEL DOORS

WINDOWS AND INSERTS

Recessed panel doors may be ordered with all sections solid (top photo) or glazed (bottom photo). Also, plastic inserts are available as window decorations in a variety of styles. Pictured is the popular "Sun-Burst" design.

Recessed, Hardboard Panel Doors

These wood panel-style doors are still America's favorite. Constructed of kiln-dried lumber, they are durable as well as attractive. Recessed hardboard panels (shown top & bottom photos) complete the picture in the standard panel doors. They are available in various sizes to suit your need and with various panel sizes and arrangements to suit your taste.

Raised Hemlock Panel Doors & Raised Redwood Panel Doors (Center Photo)

This is the "Cadillac" of wood panel doors. The rich tones of redwood raised panels lend an air of elegance to any home — whether modern or traditional in styling. And weather resistant redwood provides even longer panel life.
